

PROTOBOARD QUARTER PINOUT

64 Hole Power, 160 Hole - 32 Linked Columns

Product Information: https://uurnd.com/p/protoboard_quarter

FRONT

BACK

Pads marked **VCC/GND** when bridged by solder will connect the **2xVCC** or **2xGND** rails located at each end of the board together.

Each row/column connects like a breadboard.

Example:

Col 0, Row A-E are connected together.

Col 0, Row F-J are connected together.

But **Col 0 A-E** and **Col 0, F-J** are separate from each other.
